Kendall™ AMD Antimicrobial Foam Dressings

Covidien Kendall™ AMD antimicrobial foam dressings have been developed to support your efforts in managing both moisture and bacterial balance. The dressing is an open-cell polyurethane foam and is impregnated with 0.5% Polyhexamethylene Biguanide (PHMB), a highly effective low-toxicity antiseptic. The dressings are effective against gram positive and gram negative bacteria. They are also effective against fungi and yeast. The Kendall AMD antimicrobial foam border dressings are designed to help prevent complications like friction and shear injuries.

Additional AMD antimicrobial products can be found on pages 9 and 10.

For more information, please visit: www.KendallAMD.com or www.KendallAMDFoam.com

Kendall AMD Antimicrobial Foam Dressings

- Contain PHMB (Polyhexamethylene Biguanide).
- Resist bacterial colonization within the dressing.
- Reduce bacterial penetration through the dressing.
- Provides protection against gram-, gram+ (including MRSA and VRE) and fungi/yeast microorganisms.
- Limits cross-contamination from and to the patient, clinician and environment.
- Are sterile and hypoallergenic.

AMD Antimicrobial Dressings

If you didn't have a need for antimicrobial dressings before, you do now.

Covidien AMD Antimicrobial Dressings are part of a proven prophylactic infection prevention program. Unlike ordinary sterile dressings which do not provide an effective barrier to bacterial invasion, Covidien AMD Antimicrobial Dressings contain 0.2% Polyhexamethylene Biguanide (PHMB), a bacteria-killing polymer that virtually eliminates bacterial penetration through and growth within the dressings.

The Covidien AMD antimicrobial family of dressings are effective against both gram + and gram – bacteria as well as yeast and fungi. They are also effective against common problematic bacteria such as methicillin resistant Staphylococcus aureus (MRSA) and vancomycin resistant Enterococcus (VRE).

For more information, please visit: www.KendallAMD.com

Do not use Covidien AMD antimicrobial dressings with Dakin's Solution™ cleanser or bleach solutions. These solutions deactivate the PHMB and will cause yellowing of the product.

Kerlix™ AMD Rolls

- Contain PHMB (Polyhexamethylene Biguanide).
- Resists bacterial colonization within the dressing.
- Reduces bacterial penetration through the dressing.

Bandages/Rolls

Kerlix™ Rolls

- Made of prewashed, fluff-dried 100% woven gauze with a unique crinkle-weave pattern for loft and bulk to cushion and protect wound areas.
- Six-ply construction with finished edges reduces loose ends and lint.
- As primary dressing, open-weave design provides fast wicking action, superior aeration and excellent absorbency.
- As secondary dressing, it provides bulk, cushioning and superior conformability.
- Ideal for bandaging heads, limbs and difficult-to-dress wounds; i.e., burns, plastic and orthopedic wounds.
- Choice of three sizes for all bandaging needs.
- Available in convenient tray, soft pouch, and a wide array of non-sterile put-ups.
- Code 3324 comes packaged in a convenient dispensing carton.

Medical Adhesive Products

Curi-Strip™ Adhesive Wound Closures

- Gentle adhesive keeps wound closed with movement, stretching and skin expansion.
- Conformable spunbonded nylon backing free of reinforcing filaments for increased freedom of movement; helps minimize premature "pop-off" and formation of stress blisters.
- Highly porous backing for increased oxygen exposure.
- Superior moisture vapor transmission for minimal skin maceration.
- Curl resistance after packaging removal facilitates easy application.
